

SOLE SOURCE SUPPLIER LETTER

Rock Safety LLC produces The Lifter, Lifter PLUS and accessories.

The Lifter and Lifter PLUS are revolutionary products that automate the process of removing manhole covers and drainage grates. These tasks can now be done with the simple push of a button on a hand-held remote. We are unaware of another vehicle mounted product that automates the process to this level.

These products are patent protected and not available from any other source. The Lifter and The Lifter PLUS level of automation is unmatched in the industry. We are focused on helping organizations provide a safer, more productive work environment.

In order to control costs, we utilize a factory direct sales, marketing and distribution business model. The Lifter, Lifter PLUS and accessories are only available for purchase by customers and their suppliers on a factory direct basis.
