

SAFE. SIMPLE. SMART.

AUTOMATIC METAL COVER LIFTER

PATENTED-REMOTE CONTROL HYDRAULIC SYSTEM

Helping municipalities, DOTs, utilities, telecoms, airports, colleges, and industrial facilities streamline underground maintenance safely and efficiently.

Introducing The Lifter from Rock Safety—patented vehicle-mounted tools that automate the removal and replacement of manhole covers and grates, eliminating the need for manual handling and reducing on-the-job injuries.

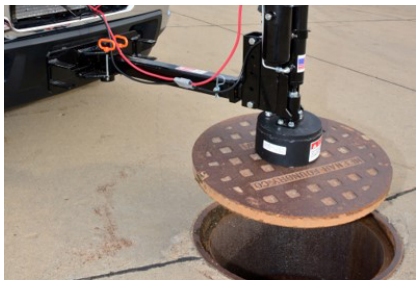

WHY THIS TOOL STANDS OUT

- **Safety-first design:** Covers weighing up to 600 lb can be removed with just the push of a button via wireless remote control.
- **User-friendly mounting:** Both tools fit into a standard 2" hitch receiver and feature a robust electro-magnet.
- **Optional accessories for enhanced flexibility:**
Swing Arm Attachments rigid options with 24" or 30" reach, plus a Folding Swing Arm that extends up to 30" (ideal for tight spaces).
Grate attachment, camera and monitor options, and more—allowing for precision, visibility, and efficient operation from within the vehicle.
- **Enhanced workflow:** Operators can approach, engage, and operate the lifter safely while seated inside the vehicle—minimizing disruptions and maximizing productivity.

“We purchased The Lifter and it’s been saving time, fingers, and backs! What used to take 8 hours is down to 4.”

— Steve - PW Director

WHAT USERS ARE SAYING

“The Lifter helps me open 300+ lb covers without the risk of an awful lifting-related injury. As far as safety is concerned, it’s a no-brainer.”

— Sarah - Engineer

HOW IT BENEFITS YOUR ORGANIZATION

FEATURE	BENEFIT
Automated Removal	Eliminates manual lifting, reducing injury risk and worker fatigue.
Vehicle-Mounted	Quick deployment using existing fleet—no complex installation needed.
Remote Operation	Maintain full control from inside your vehicle—safer and more efficient.
Accessory Options	Customizable for your unique needs: tight spaces, better visibility, etc.

Put safety first. Streamline your underground maintenance today.

THE LIFTER - SPECIFICATIONS

LIFTER

Weight	32 Lbs
Length (With Camera & Magn)	38 inches

POWER UNIT

Amperes	17 amps
2" Bore X 16" Stroke	Yes
Adhesion (metal to metal)	Yes
Type of Hydraulic Oil	Auto Transmission Oil

MAGNET

Weight	48 lbs
Diameter with connector	8 inches
Amps	17 Amps
Voltage	12 volts
Adherence Equivalent	3,500 lbs

CAMERA/MONITOR (optional)

Color Camera - High Density	Yes
Infra red LEDs	Yes
Heated with Intercom	Yes
Accepts up to 2 Cameras	Yes
High Resolution - Pixels	Yes
Digital Screen Size	7-inch

GENERAL SPECS

Lifting capacity	600lbs
Voltage	12 Volts
Vehicle Receptical	2" Hitch
Frame - Adjustable Height	Yes
Cylinder Stroke	16 Inches
Lifter with Magnet	97 lbs
Gloss Black Power Coating	Yes
Minimum Vehicle Capacity	3/4 T. - 2500
Vehicle Battery Capacity	800 Amps
Remote - Waterproof	Yes

OPTIONAL

Swing Arm Weight	43 lbs
Grate Attachment Weight	24 lbs
